

C. Spencer Cochran, M.D. Jack P. Gunter, M.D.

Rhinoplasty and Secondary (Revision) Rhinoplasty

Focused Specialization. Esteemed Reputation. Rhinoplasty is considered the most difficult operation in cosmetic surgery. Dr. Jack Gunter and Dr. Spencer Cochran are two of only a handful of physicians in the United States who focus exclusively on rhinoplasty and rhinoplasty-related procedures. Their singular dedication to nose reshaping can be summed up in one phrase: form, function, and the pursuit of perfection.

Renowned for his contributions spanning 30 years, Dr. Gunter's influence continues to be felt on an international scale. His innovative techniques are shared with fellow surgeons worldwide through the Dallas Rhinoplasty Symposium which he founded in 1984. As co-editor of *Dallas Rhinoplasty*:

Surgery by the Masters, he is recognized as the physician who "wrote the definitive book" on rhinoplasty.

Dr. Cochran, a highly respected rhinoplasty surgeon, was hand-selected by Dr. Gunter for his knowledge and skill in all aspects of nasal surgery. Like Dr. Gunter, his keen aesthetic eye, deep understanding of anatomy, and remarkable technical proficiency give him the ability to strike the perfect balance between form and function for his patients. Both doctors will tell you their greatest satisfaction is derived from participating in the emotional transformation patients experience as a result of their positive physical change.

EDUCATION: Dr. Gunter—M.D., University of Oklahoma School of Medicine; Residency, Tulane University EENT Hospital; Residency, University of Michigan Hospital
Dr. Cochran—M.D., University of Texas Health Science Center at San Antonio; Residency, University of Texas Southwestern Medical Center at Dallas
